XL Sucker Pumps

Now it's easier than ever to pump your cock to a bigger and better size! The **XL Sucker** range of Penis Pumps comprise of a plastic cylinder that fits over your penis and helps you get an erection - or a bigger erection - by suction. As the air in the cylinder is sucked out, the vacuum pulls your penis into the cylinder and more blood rushes into the penis. After removing the cylinder, the result is a temporarily bigger dick and a more impressive erection! Built to add length and girth to the penis, or to achieve and maintain an erection, your XL Sucker creates a vacuum in the chamber which then draws blood to the penis making it larger. Pump users usually report an increase in their length or girth after regular penis pump usage.

Bathmate

The **Bathmate** penis pump is the world's first water-based device for enlarging the penis, with instant sustainable results - and it's a whole lot of fun too! The device is filled with water and placed over the penis, sealing at the base against your body. The gaiter acts as both a seal and as the pump mechanism. As you compress the device against your body, excess water is expelled causing a hydro vacuum which is much stronger than you could create with an air based vacuum pump. Over time it is thought that most individuals can gain between 1-3 inches in length with a 25% increase in girth!

The Inflatable Enema Plug is an ingenious idea which is very simple to use. The smooth silicone plug slides easily into place and can be gently inflated using the hand bulb. When the desired level of inflation is achieved the plug's base sits tight against the anus to create a water tight seal. Then water or other liquid can be introduced to the rectum, either by using one of the Clean Stream bag enema systems or an In-Line Accelerator Pump, creating a very satisfying feeling of being filled. Then, when the time comes to end the session, the pressure valve is released deflating the plug and releasing the fluid.
