

Most individuals can gain between 1-3 inches in length and a 25% increase in girth!

How often?

Initial sessions should not exceed 20 minutes but can be extended up to a maximum of one hour in any 24 hour period - you will be simply amazed at the development in both the erect and flaccid size of your penis, and it can also psychologically dramatically improve your performance too. The whole experience is pretty pleasurable too!

Why Bathmate?

There are many advantages to using a Bathmate...

Your penis will get bigger, faster compared to alternative methods. No surgery is required. Your erections can become much harder. Water can help the skin to stretch easier. The vacuum is 2nd to none. The results are fast and visible in 15 minutes. It's discreet and easy to use.

Are the gains permanent?

Retention levels of both the length and girth increase that are made with the Bathmate can differ greatly from one man to another. Everybody is genetically different and just as some people can visit the gym once a month and look like a pro athlete, some men need to workout everyday to maintain this state.

Our studies show that, once increases have been made there is no reason why these gains would reduce for any other reason than the ageing process.

Safety

Although this is a safe product, you should make sure that you follow the instructions carefully. You should consult your doctor before using the product if you suffer from any physical penile conditions. Do not use if you have recently had surgery in this area or if you suffer any discomfort prior or after first use.

Penis Pumps have been used for years and are recommended by medical practitioners for Erectile Dysfunction (ED).

Side effects

Yes- and fortunately they are all ones which can bring both you and your partner increased pleasure! As well as resulting in a bigger penis Bathmate can also enhance your sex drive, increase your staying power and intensify ejaculations.

Bathmate in the shower?

Bathmate can be used whilst showering, in fact many men find this to be even more convenient than using in the bath. In fact the only reason we suggest that you use the device in the bath or shower is to allow for the water to drain away. You could use the device anywhere that a water supply, modesty and drainage allows!

BATHMATE Code: SP0027 £80.00

NEW

Bathmate Goliath

The Goliath is some 30% bigger in all directions than the standard Bathmate. Boasting a maximum width of 11.5cm and an impressive maximum length of 35cm this fine device is designed to accommodate the already large penis or to allow extra room to grow for the ambitious!

GOLIATH Code: SP0028 £130.00
