# XLsucker Pumps

Now it's easier than ever to pump your cock to a bigger and better size! The **XLsucker** range of Penis Pumps comprise of a plastic cylinder that fits over your penis and helps you get an erection - or a bigger erection - by suction. As the air in the cylinder is sucked out, the vacuum pulls your penis into the cylinder and more blood rushes into the penis. After removing the cylinder, the result is a temporarily bigger dick and a more impressive erection! Built to add length and girth to the penis, or to achieve and maintain an erection, your XLsucker creates a vacuum in the chamber which then draws blood to the penis making it larger. Pump users usually report an increase in their length or girth after regular penis pump usage.

# Bathmate

The **Bathmate** penis pump is the world's first water-based device for enlarging the penis, with instant sustainable results - and it's a whole lot of fun too! The device is filled with water and placed over the penis, sealing at the base against your body. The gaiter acts as both a seal and as the pump mechanism. As you compress the device against your body, excess water is expelled causing a hydro vacuum which is much stronger than you could create with an air based vacuum pump. Over time it is thought that most individuals can gain between 1-3 inches in length with a 25% increase in girth!
