Bathmate

The Bathmate penis pump is the world's first water-based device for enlarging the penis, with instant sustainable results - and it's a whole lot of fun too! The device is filled with water and placed over the penis, sealing at the base against your body. The gaiter acts as both a seal and as the pump mechanism. As you compress the device against your body, excess water is expelled causing a hydro vacuum which is much stronger than you could create with an air based vacuum pump. Over time it is thought that most individuals can gain between 1-3 inches in length with a 25% increase in girth!

XL Sucker Pumps

Now it's easier than ever to pump your cock to a bigger and better size! The XL Sucker range of Penis Pumps comprise of a plastic cylinder that fits over your penis and helps you get an erection - or a bigger erection - by suction. As the air in the cylinder is sucked out, the vacuum pulls your penis into the cylinder and more blood rushes into the penis. After removing the cylinder, the result is a temporarily bigger dick and a more impressive erection! Built to add length and girth to the penis, or to achieve and maintain an erection, your XL Sucker creates a vacuum in the chamber which then draws blood to the penis making it larger. Pump users usually report an increase in their length or girth after regular penis pump usage.

Our Plastic Trigger Pump is made in the UK to very high medical standards - it can actually be found in everyday use in UK hospitals.

- More powerful • Medical quality
- Pressure gauge option and release valve

Harder, bigger and more powerful erections

Although the traditional ball pumps supplied with Standard, Maxitone and Vibrating Power Pumps are usually more than ample for most users to create the strength of erection that they seek, we are constantly asked for a stronger pump, preferably of the Trigger variety.

A Trigger Pump will create harder, bigger and more powerful erections, as they are capable of creating much greater vacuum pressures within the vacuum cylinder itself.

The versatile choice

These pumps are of excellent quality and are both light and easy to use. All pumps have a push button release valve and a pressure gauge is available as an option.

They can be purchased as a stand alone device as a compliment to your existing developer at the prices below, or (on our website) as an upgrade to our Standard, Oversized, or Maxitone pumps at the time of initial purchase.
